

Confidence After We Fail

Cryptogram Puzzle

Our consulate in Prizainmy has just received this coded message from one of their local operatives. He has previously failed to communicate, but we've offered him this chance to get things right. Our decoding staff are all participating in a middle school Lego robotics competition. So we need your help to get this message out to your church. The Key is on the left and below is an example of how it works. Pass the decrypted message to your missions chairman.

NOLELEVEFELEJ = HELLO WORLD
