

## **Chapter Two**

### **Engineering**

#### **Questions for Reflection and Discussion**

1. How would you define engineering?
2. What influenced you to become an engineer (or, on the other hand, not to become an engineer)?
3. In addition to those listed, what other achievements are linked to engineering?
4. In your experience, how have non-engineers viewed engineers? How would you like to be seen?
5. What is your favorite stereotype of engineers?
6. Where do you see engineering going in the next fifty years?
7. How would you begin to articulate a theology of engineering?
