

## **Chapter Nine**

### **God and the Engineers**

#### **Questions for Reflection and Discussion**

1. In what additional ways has God “done engineering”?
2. What would you add to a theology of engineering?
3. How might your understanding, as an engineer, of the nature of God differ from, say, that of an artist?
4. Where do you primarily see evidence of God’s creativity? How is it an example to you?
5. How (specifically) has engineering been affected by the Fall?
6. How is engineering a “common grace” activity?
7. Do you think that science and technology make it easier or harder to trust in God?
8. Do you expect any forms of engineering in heaven/ the new creation?
