Week 1: June 19-23, 2023

8:00 AM - 12:00 PM

Artful Antics	grades K-2	\$190
Junior Olympics 2023	grades K-3	\$190
Mad Scientists (NEW)	grades K-4	\$190
Fabulous Flying Creations	grades 2-4	\$190
Jr. Robotics: LEGO Construction	grades 2-4	\$190
LeTourneau Space Camp	grades 2-5	\$230
BattleBots Robotics Competition	grades 3-7	\$190
Camp You-Koo-Lay-Lay (instrument included)	grades 3-7	\$200
Minecraft	grades 3-12	\$150
Coding	grades 4-12	\$150
Jr. Engineers	grades 5-8	\$190
3D Printing (NEW)	grades 5-12	\$190
Survival Skills Camp	grades 5-12	\$230

Week 2: June 26-30, 2023

8:00 AM - 12:00 PM

How the GRINCH MOVED Christmas!	grades K-4	\$190
Young Einsteins (NEW)	grades K-4	\$190
Under the Big Top (NEW)	grades K-4	\$190
Jr. Robotics: LEGO Construction	grades 2-4	\$190
Wings and Flying Things	grades 2-6	\$230
BattleBots Robotics Competition	grades 3-7	\$190
Jr. Engineers	grades 5-8	\$190
Minecraft	grades 3-12	\$150
Coding	grades 4-12	\$150
3D Printing (NEW)	grades 5-12	\$190
Psych Crime Investigations	grades 6-12	\$100
Self-Defense for TEENS (NEW)	grades 9-12	\$150

Week 1: June 19-23, 2023

1:00 PM - 5:00 PM

Once Upon a STEM (NEW)	grades K-2	\$190
Fun & Games with Self Defense	grades K-4	\$150
Camp Whatchamacallit (NEW)	grades K-4	\$190
Jr. Robotics: LEGO Science	grades 2-4	\$190
Incredible Stuff	grades 2-5	\$230
Medieval Times	grades 2-7	\$190
Upcycle / Recycle Art (NEW)	grades 3-7	\$190
Minecraft	grades 3-12	\$150
BattleBots Robotics Competition	grades 4-9	\$190
Pinterest Interest	grades 5-8	\$190
Drone Flight Racing (DRONE included)	grades 7-12	\$400

Week 2: June 26-30, 2023

1:00 PM - 5:00 PM

Fun & Games with Self Defense	grades K-4	\$150
Camp Crafty (NEW)	grades K-4	\$190
Passports & Pawprints	grades K-5	\$190
An Animal ART Adventure Around the World		
Jr. Robotics: LEGO Science	grades 2-4	\$190
Insane Science (NEW)	grades 2-7	\$190
Slime Camp	grades 4-8	\$230
BattleBots Robotics Competition	grades 4-9	\$190
You Made That?! (UPGRADED)	grades 5-8	\$190
Minecraft	grades 3-12	\$150

June 19-23, 2023

8:00 AM-12:00 PM

Artful Antics (grades K-2) \$190: Do you love to paint, draw, color, and get messy? Then you have found your camp! We will have a fun week full of art activities, including painting with shaving cream, watercolor paints, mosaics, coloring, cutting, and gluing to create wonderful works of art. LOTS of artwork and creativity happening in this camp. Director: Allison Wooden

Junior Olympics 2023 (grades K-3) \$190: Let the 2023 LETU Summer Junior Olympics begin! Get ready to run, jump, be silly, and have TONS of FUN through friendly and active play with our very own Summer Olympics. We will have "Olympic" type outdoor activities to challenge young campers to work together to achieve the GOLD. Campers will learn sportsmanship, the value of teamwork, and the character of a true Olympian. **Please note: Active clothes, tennis shoes and socks required!** Director: Katie Zappasodi

Mad Scientists NEW (grades K-4) \$190: Attention all young scientists! Are you curious about science and ready to try new experiments? Each day we combine learning, science discovery and physical fun to find answers to questions by putting in the hard work and doing lots and lots of crazy experiments. Learn about the sun and its effects, enjoy an ooey-gooley day, experience hot verses cold day. Then end the camp week experimenting on what all kids love the most... candy! Director: Charity Boozier

Fabulous Flying Creations (grades 2-4) \$190: What do you get when you have a LeTourneau Engineering professor that loves the world of Aviation? You get to ENJOY a camp that centers around creating lots of cool flying things! If you like making things that FLY... then this is your camp. Time to let your imagination soar! Director: JoLin Gowing (LETU Engineering Professor)

Jr. Robotics- LEGO Construction (grades 2-4) \$190: This beginner engineering robotic camp encourages kids to use their minds to learn how to bring robot creations to life! LEGO WeDo Construction uses the LEGO pieces kids already love, and teaches them how to create, build and program a robot so that it actually moves! This camp teaches beginner coding using a dragging and dropping method that instructs the robots movements. Campers work together in teams and will show off their brilliant robotic creation on the final day of camp. Great camp for young engineers! Director: Paula Hjorth

LeTourneau Space Camp (grades 2-5) \$230 : Yes, it is Rocket Science! Join the hundreds of other young astronauts who have set their sights on the stars. Learn about the Solar System, Newton's laws of motion, and build a different take-home project every day. Construct, decorate, and launch your very own TWO FOOT TALL REAL rocket that will soar nearly 1000 feet into the Texas sky! Don't get left on the ground. Outer Space may be infinite, but we have room for only a limited number of Junior Space Explorers. Director: "Mr. Lee" Wilkinson

BattleBots Robotics Competition (grades 3-7) \$190: Let the battle BEGIN! Whose BattleBot will be the "last robot standing"? Will it be yours? Come enjoy this engaging and competitive camp where partners work together to design and build their own motorized robot to compete in the BattleBot championship! Partners will participate in individual and group mini challenges using math, science, engineering and technology to earn points that can be redeemed for "extra items" to help transform their robot into a true BattleBot! Who is up for the challenge? Director: Janice Park

Camp Yoo-Koo-Lay-Lay (grades 3-7) \$200: It is time to let your musical side grow! We provide the ukulele and you provide the FUN! Are you at all curious to learn how to play the ukulele? Well, we can help with that! You will be taught the basic chords and foundations to play. You will work on music together that you can "show off" on your final day of camp. What do you do after the camp is done— PLAY MORE! Because ***the ukulele goes home with you***. We hope to leave you with the love of playing the ukulele and start your summer filled with music. Director: Meredith Ramos

Minecraft (grades 3-12) \$150: Calling all Minecrafters! Whether you are a beginner or expert, we have something for you. Love Creative Mode? You and your team members will collaborate on a truly epic construction project. Prefer to test your skills in Survival Mode? Your team will work together, pooling your knowledge and gathering resources to defend your underground lair or mountaintop castle from Creepers and Endermen. PLUS, other exciting events! With an emphasis on teamwork and fun in all activities, join us for the most memorable Minecraft experience of your year! Director: Jessica Starks

June 19-23, 2023

8:00 AM-12:00 PM

Coding (grades 4-12) \$150: Want to create your own game or app? Curious about coding, but don't know where to start? Come join our introductory camp, and you'll find yourself in the fun and challenging world of coding. We'll use CODE.ORG's beginner-friendly curriculum to develop simple algorithms that perform complex tasks. Working alone or in teams, campers will have the opportunity to design, code, and debug games and apps to show off to their family and friends. Director: Ethan Cooper

Jr. Engineers (grades 5-8) \$190: This is the camp for inventors and creators! We will build mousetrap powered race cars, flying objects, air-powered missiles, boats or submarines and launch EGGstronauts in vehicles of our own design from a giant slingshot....to name a few. If it can go, we will make it! Director: Lance Homeniuk

3D Printing NEW (grades 5-12) \$190: Are you ready to enter into the exciting world of 3D printing? No experience required to design and print your own creations to take home. Based out of LeTourneau's Maker Lab, campers will draw designs on the computer, print them on 3D printers, and be hands-on while learning how to make the best prints possible. Sign up for this high-tech camp to bring your imagination to life using this powerful new technology! Director: Darryl Low (LETU Engineering Professor)

Survival Skills Camp NEW (grades 5-12) \$230: You find yourself in the middle of nowhere with nothing but the clothes you are wearing and the things in your pocket. What do you do first? Campers will learn how to manage emergency and survival situations with the skills we learn through the week. We will cover priorities of work in a survival situation such as: basic first aid techniques (no certifications will be provided), building a basic shelter, building a fire, finding safe water and food, how to signal for help, and how to navigate. We will have a group competition at the end of the week to challenge the skills learned during the week.

Each camper will leave the week with a bag FULL of survival supplies.

This camp will take place primarily outdoors and will involve outdoor walking and activities. Tennis shoes and socks required!

Director: Ruedi Schubarth (LETU Aviation Professor)

June 19-23, 2023

1:00 PM-5:00 PM

Once Upon a STEM NEW (grades K-2) \$190: Once upon a time, there was a camp that learned that storybooks can be a powerful way to introduce scientific STEM concepts to young creative minds. This camp will help enhance and excite campers creativity and curiosity together through STEM projects as they look at the world full of stories. Director: Alison Roedel

Fun and Games with Self Defense (grades K-4) \$150: Kids learn through PLAY! That's why this popular energetic class is full of games and activities that translate into self-defense later in life. Campers enjoy FUN games including balance drills and stranger danger that will keep them on task, physically moving and motivated. This is a GREAT class for those with lots of energy! The children are our future, let's keep them safe and have FUN while learning. Director: Emmett Shankle

Camp Whatchamacallit NEW (grades K-4) \$190: What do you call a week that is full of activities, crafts, music, FUN and MORE each day of the week? Whatchamacallit! Monday campers will explore the OCEAN. Tuesday they become PIRATES. Wednesday we enjoy a LUAU. Thursday we get our WESTERN gear on. And we end our week Friday at the CIRCUS! Who is ready for some FUN? Director: Charity Boozier

Jr. Robotics– LEGO Science (grades 2-4) \$190: This beginners engineering robotic camp encourages kids to use their minds to learn how to bring their robot creations to life! LEGO WeDo Science software uses the LEGO pieces kids already love, and incorporates new STEM concepts like engineering and programming. We will be teaching our campers how to design, create, and program robots! They will learn a drag and drop method of coding that will instruct their robots movements. Campers work together in teams and will show off their brilliant robotic creations on the final day of camp. Who is ready for the challenge? Director: Paula Hjorth

Incredible Stuff (grades 2-5) \$230: Have you ever wanted to make your own chewing gum? Gummy bears? Soda pop? What about building your own catapult? Make bath bombs? Construct flying machines? You can do all this and much more in this exciting camp! Lots of thrilling hands-on projects keep young scientists busy all week. Don't wait, this camp fills up very fast! Director: "Mr. Lee" Wilkinson

Medieval Times (grades 2-7) \$190: Enter through the drawbridge into the world of castles, knights, and dragons. Role play life in a feudal society, create your own coat of arms, practice knightly manners and sword play. On Friday we will witness a dragon burp, fight in a melee, fire a trebuchet, and storm castle walls. You don't want to miss this amazing camp! Director: Lance Homeniuk

Upcycle / Recycle Art NEW (grades 3-7) \$190: There is a saying, "One man's trash is another man's treasure." This camp brings this saying to life! Campers will learn that just about anything you might have lying around your house can be transformed into a beautiful work of art. Get ready to allow your creativity to show off your personality in this camp. Enjoy the world of upcycle/recycle art creations in this unique and exciting art camp! Director: Carolyn Jagers

Minecraft (grades 3-12) \$150: Calling all Minecrafters! Whether you are a beginner or expert, we have something for you. Love Creative Mode? You and your team members will collaborate on a truly epic construction project. Prefer to test your skills in Survival Mode? Your team will work together, pooling your knowledge and gathering resources to defend your underground lair or mountaintop castle from Creepers and Endermen. PLUS, other exciting events! With an emphasis on teamwork and fun in all activities, join us for the most memorable Minecraft experience of your year! Director: Ethan Cooper

BattleBots Robotics Competition (grades 4-9) \$190: Let the battle BEGIN! Whose BattleBot will be the "last robot standing"? Will it be yours? Come enjoy this engaging and competitive camp where partners work together to design and build their own motorized robot to compete in the BattleBot championship! Partners will participate in individual and group mini challenges using math, science, engineering and technology to earn points that can be redeemed for "extra items" to help

June 19-23, 2023

1:00 PM-5:00 PM

Pinterest Interest (grades 5-8) \$190: If you enjoy crafts and creations, then go ahead and sign up now for this fun, relaxing and creative camp. You will be able to bring your own personality into the mix as each camper's designs represent them! Great camp for learning new gift ideas to make for family and friends. Be brave and dive into the world of Pinterest, as you can continue on after camps with the creations it inspires. Director: Allison Wooden

Drone Flight Racing (grades 7-12) \$400: Are you looking for a fast-paced adrenaline rush and interested in technology? First-person-view (FPV) drone racing might fit your style! Sign-up for this exciting camp where you will learn to safely fly a quadcopter through obstacles and around an indoor course. Professional drone pilot and aviation professor, Ruedi Schubarth, will teach the camp, which includes all of the basic drone parts and materials so you can take your skills home after camp.

It's yours to keep after you learn how to fly it! Please note: Tennis shoes and socks required!

Director: Ruedi Schubarth (LETU Aviation Professor)

June 26-30, 2023

8:00 AM-12:00 PM

How the GRINCH MOVED Christmas! (grades K-4) \$190: Who says Christmas can only come once a year?? Not at this camp! Campers will enjoy a different theme for each day of camp, including: GRINCH day, Snow Fun, All Things Candy and Gingerbread, Reindeer Games, and our Holly Jolly Christmas Party. Every day of camp we will include FUN hands-on activities such as: games or a gingerbread decorating contest and we will bring out creativity with arts and crafts, including: making their own snow globe, learning how to draw the GRINCH, painting a fun picture of Santa Claus, and more! What a great time to enjoy learning the true meaning of Christmas! It's beginning to look a LOT like Christmas and we LOVE it! Director: Allison Wooden

Young Einsteins NEW (grades K-4) \$190: Attention all young scientists! Enjoy this interactive camp that will encourage your mind to ask questions and seek out answers through experiments! Each day we will combine learning, science discovery, and physical fun to find answers to questions by putting in the hard work and doing lots of crazy FUN experiments. Get ready to explore your curiosity and increase your love for science in this hands-on creative camp. Director: Alison Roedel

Under the Big Top NEW (grades K-4) \$190: Ladies and Gentlemen, you are about to experience a camp like no other! Walk through "rings of fire", walking the tightrope, test your strength with barbells and other FUN child approved circus games. The Ringmaster will tell stories, share about character, and explore crafts and activities that brings the circus to Longview. Director: Charity Boozier

Jr. Robotics- LEGO Construction (grades 2-4) \$190: This beginners engineering robotic camp encourages kids to use their minds to learn how to bring robot creations to life! LEGO WeDo Construction uses the LEGO pieces kids already love, and teaches them how to create, build and program a robot so that it actually moves! This camp teaches beginner coding using a dragging and dropping method that instructs the robots movements. Campers work together in teams and will show off their brilliant robotic creation on the final day of camp. Great camp for young engineers! Director: Paula Hjorth

Wings and Flying Things (grades 2-6) \$230: Calling all Junior Aviators! Do you like airplanes? Helicopters? Balloons? Gliders? Then go ahead and sign up now! We will explore what makes things fly through the air by building model airplanes, rubber band powered helicopters, helium airships, and real hovercraft. Try your hand flying the X-Plane Simulator. And see if you can land your aircraft on the runway! Explore the world of the air in this super exciting camp taught by a Certified Flight Instructor. Director: "Mr. Lee" Wilkinson

BattleBots Robotics Competition (grades 3-7) \$190: Let the battle BEGIN! Whose BattleBot will be the "last robot standing"? Will it be yours? Come enjoy this engaging and competitive camp where partners work together to design and build their own motorized robot to compete in the BattleBot championship! Partners will participate in individual and group mini challenges using math, science, engineering and technology to earn points that can be redeemed for "extra items" to help transform their robot into a true BattleBot! Who is up for the challenge? Director: Janice Park

Jr. Engineers (grades 5-8) \$190: This is the camp for inventors and creators! Campers will build mousetrap powered race cars, flying objects, air-powered missiles, boats or submarines and launch EGGstronauts in vehicles of our own design from a giant slingshot...to name a few! If it can go, we will make it! Director: Lance Homeniuk

Minecraft (grades 3-12) \$150: Calling all Minecrafters! Whether you are a beginner or expert, we have something for you. Love Creative Mode? You and your team members will collaborate on a truly epic construction project. Prefer to test your skills in Survival Mode? Your team will work together, pooling your knowledge and gathering resources to defend your underground lair or mountaintop castle from Creepers and Endermen. PLUS, other exciting events! With an emphasis on teamwork and fun in all activities, join us for the most memorable Minecraft experience of your year! Director: Jessica Starks

Coding (grades 4-12) \$150: Want to create your own game or app? Curious about coding, but don't know where to start? Come join our introductory camp, and you'll find yourself in the fun and challenging world of coding. We'll use CODE.ORG's beginner-friendly curriculum to develop simple algorithms that perform complex tasks. Working alone or in teams, campers will have the opportunity to design, code, and debug games and apps to show off to their family and friends. Director: Ethan Cooper

June 26-30, 2023

8:00 AM-12:00 PM

3D Printing NEW (grades 5-12) \$190: Are you ready to enter into the exciting world of 3D printing? No experience required to design and print your own creations to take home. Based out of LeTourneau's Maker Lab, campers will draw designs on the computer, print them on 3D printers, and be hands-on while learning how to make the best prints possible. Sign up for this high-tech camp to bring your imagination to life using this powerful new technology! Director: Darryl Low (LETU Engineering Professor)

Psych Crime Investigations (grades 6-12) \$100: Have you ever been curious on how to solve crimes? Want to know the behind-the-scene ways that cops are able to capture criminals? Are you good at looking for clues? Then this camp is for you! Come learn how to investigate in real crime scene scenarios by using the tactics and techniques that real Longview Police Officers teach to help solve crimes. Enjoy learning how to fingerprint, and put on handcuffs to your criminals as an added BONUS! Get ready to use your mind and skills and put them to work. Director: Officer Bryan Bankston

Self-Defense for TEENS NEW (grades 9-12) \$150: We highly encourage all teens to attend this camp!! Teens will be taught self-defense skills in a safe and controlled environment. Prevention measures will be demonstrated to increase awareness and avoid dangerous situations. Camp will include: reality-based scenarios, exit strategies, and more. Mr. Emmett is a skilled instructor that is well relatable with teens. He knows of the dangers that surrounds our teens here in Longview, and is ready to help them be aware and prepare for their safety. Director: Emmett Shankle

June 26-30, 2023

1:00 PM-5:00 PM

Fun & Games with Self Defense (grades K-4) \$150: Kids learn through PLAY! That's why this popular energetic class is full of games and activities that translate into self-defense later in life. Campers enjoy FUN games including balance drills and stranger danger that will keep them on task, physically moving and motivated. This is a GREAT class for those with lots of energy! The children are our future, let's keep them safe and have FUN while learning. Director: Emmett Shankle

Camp Crafty NEW (grades K-4) \$190: Let's make crafts, more crafts, and why not... even more crafts!

If you have a child that is super creative and enjoys making arts and crafts, then this is their camp! They will enjoy hands-on FUN all week long and be excited to show off all of their daily creations. Director: Alison Roedel

Passports & Pawprints—An Animal ART Adventure Around the World (grades K-5) \$190: Come travel with us around the world through ART, ANIMALS and CULTURE! Each day we will focus on a different culture and learn about the ANIMALS that live in its habitat. Creating beautiful pieces of art by bringing the two things together, from the Molasses of Mexico to Gyoatoko fish printing of Japan! This camp will incorporate many techniques- printmaking, painting, drawing, collage, and fabric art to expose the campers to a variety of art making methods. Then on the final day of camp, come enjoy an "Around the World Art Exhibit" to show off our fabulous camper creations! Director: Carolyn Jagers

Jr. Robotics—LEGO Science (grades 2-4) \$190: This beginners engineering robotic camp encourages kids to use their minds to learn how to bring their robot creations to life! LEGO WeDo Science software uses the LEGO pieces kids already love, and incorporates new STEM concepts like engineering and programming. Teaching our campers how to design, create, and program robots! They will learn a drag and drop method of coding that will instruct their robots movements. Campers work together in teams and will show off their brilliant robotic creations on the final day of camp. Who is ready for the challenge? Director: Paula Hjorth

Insane Science NEW (grades 2-7) \$190: Is it magic, or science? Discover the secrets of Chemistry. Perform slight-of-hand tricks with Physics. Read minds using Math. Learn how your brain and senses make things appear that aren't really there. Experience the world of Science in a way you have never experienced before with a scientist who loves what he does! Your kids will be amazed. Director: Lance Homeniuk

Slime Camp (grades 4-8) \$230: Have you ever wanted to get slimed? Here is your chance in this exciting Chemistry camp. Junior chemists use real scientific equipment to make tons of slime, ooze, slush, S.S.N.O.T., Elephant Toothpaste, and many other polymer creations. At the end of the week, each student takes home their own equipment and supplies to continue their experiments post-camp! Don't let this slimy camp slip past you as it is VERY Popular, sign up today! Director: "Mr. Lee" Wilkinson

BattleBots Robotics Competition (grades 4-9) \$190: Let the battle BEGIN! Whose BattleBot will be the "last robot standing"? Will it be yours? Come enjoy this engaging and competitive camp where partners work together to design and build their own motorized robot to compete in the BattleBot championship! Partners will participate in individual and group mini challenges using math, science, engineering and technology to earn points that can be redeemed for "extra items" to help transform their robot into a true BattleBot! Who is up for the challenge? Director: Janice Park

You Made That?! UPGRADED (grades 5-8) \$190: If you like to design and create your own gifts, then come and enjoy this CALM and CREATIVE camp that brings out your inner fashionista! Why buy jewelry from the store, when you can make (and even sell!) your own creations? Let your inner designer customize creative ways to make jewelry such as: tie-dye bracelets, hemp bracelets, layered necklaces and bracelets, friendship bracelets, daisy chains, dangle earrings, and so much more! Every day of camp you will leave with at least 2 or 3 pieces of your own beautiful creations Director: Allison Wooden

Minecraft (grades 3-12) \$150: Calling all Minecrafters! Whether you are a beginner or expert, we have something for you. Love Creative Mode? You and your team members will collaborate on a truly epic construction project. Prefer to test your skills in Survival Mode? Your team will work together, pooling your knowledge and gathering resources to defend your underground lair or mountaintop castle from Creepers and Endermen. PLUS, other exciting events! With an emphasis on teamwork and fun in all activities, join us for the most memorable Minecraft experience of your year! Director: Ethan Cooper
